

0905 Feature 6 IHSN Shell Book Introduction

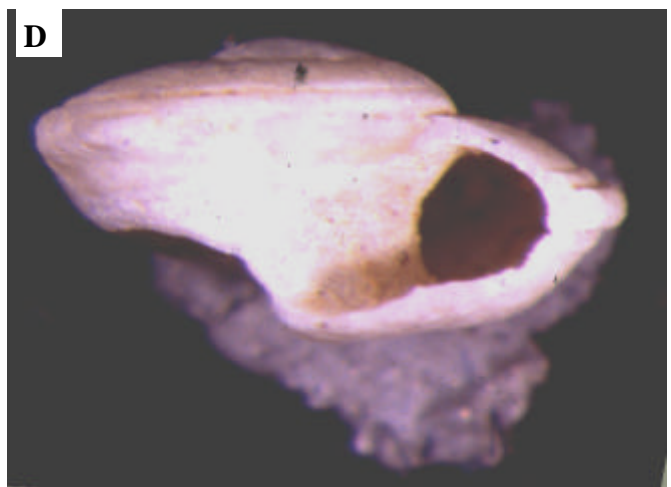

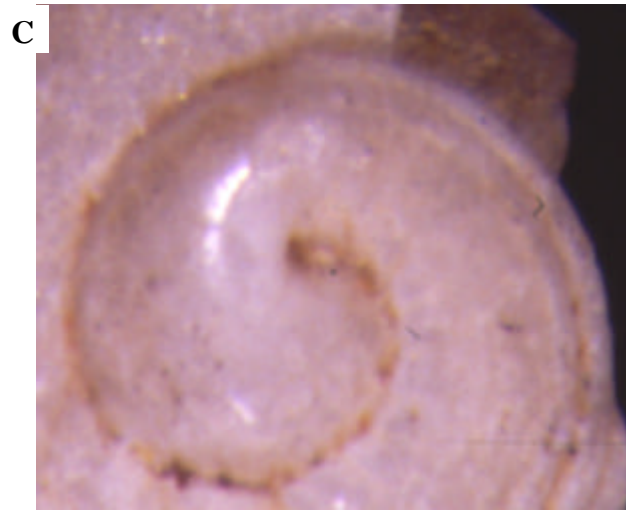

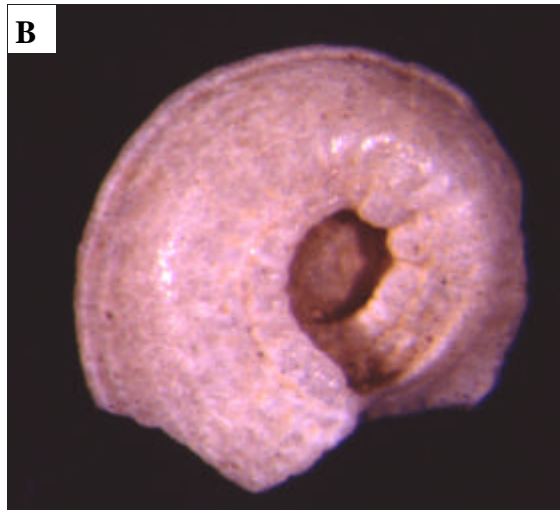

This will be part of a book of Thorsson's photos of molluscs in his files under a main folder, "Molluscs". Chapters in this Feature will be by family names used in Thorsson's files. When converted to a CD book, they will be placed in taxonomic order indicated in Hawaiian Marine Shells by E. A. Kay (1979) or in A Classification of the Living Mollusca, Vaught, 1989.

Some of my files were named by other than family names such as Berthault photos. When I put them in Feature 6 they will be on pages by the correct family names.

Family names alone do not reflect their correct placement in taxonomic order.

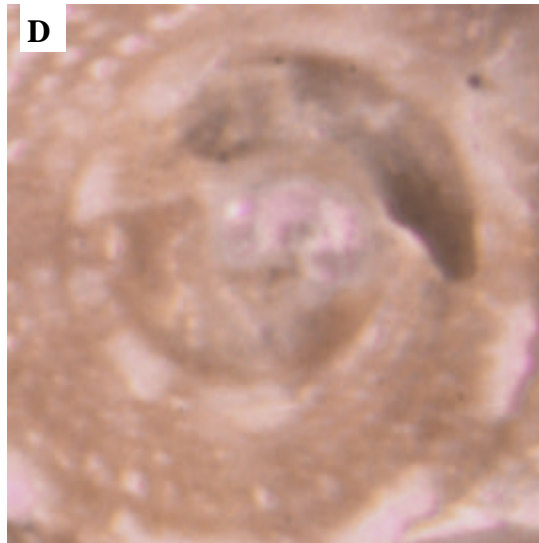

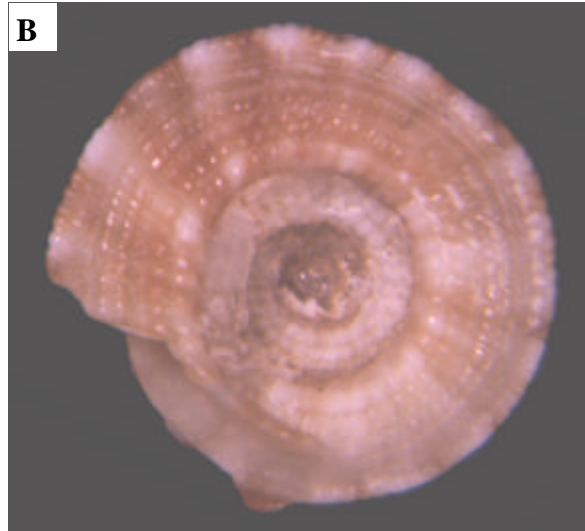

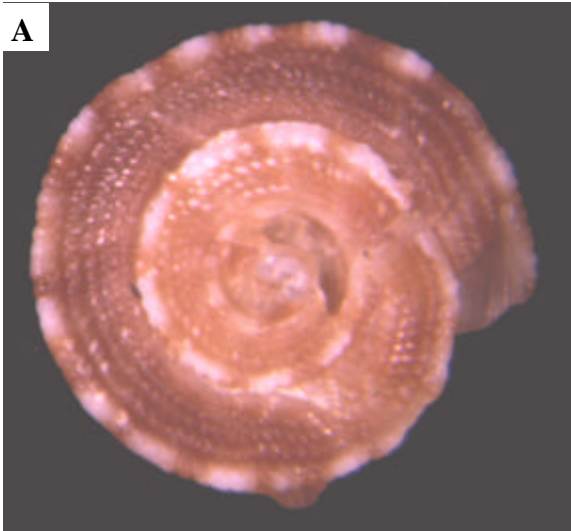

The length of IHSN sections are regulated to result in an Acrobat version that is about 1 megabyte in size which can be downloaded by computers with moderately fast access to the Internet..

Article	Families Added
0903Fea6	Aclididae Adeorbidae Amathinidae Hydatinidae Amplustridae

Solatisonax supraradiata

Film 786, 1 mm, from Oahu. Source of name is Martens, 1904.

Healiaxis coralinus

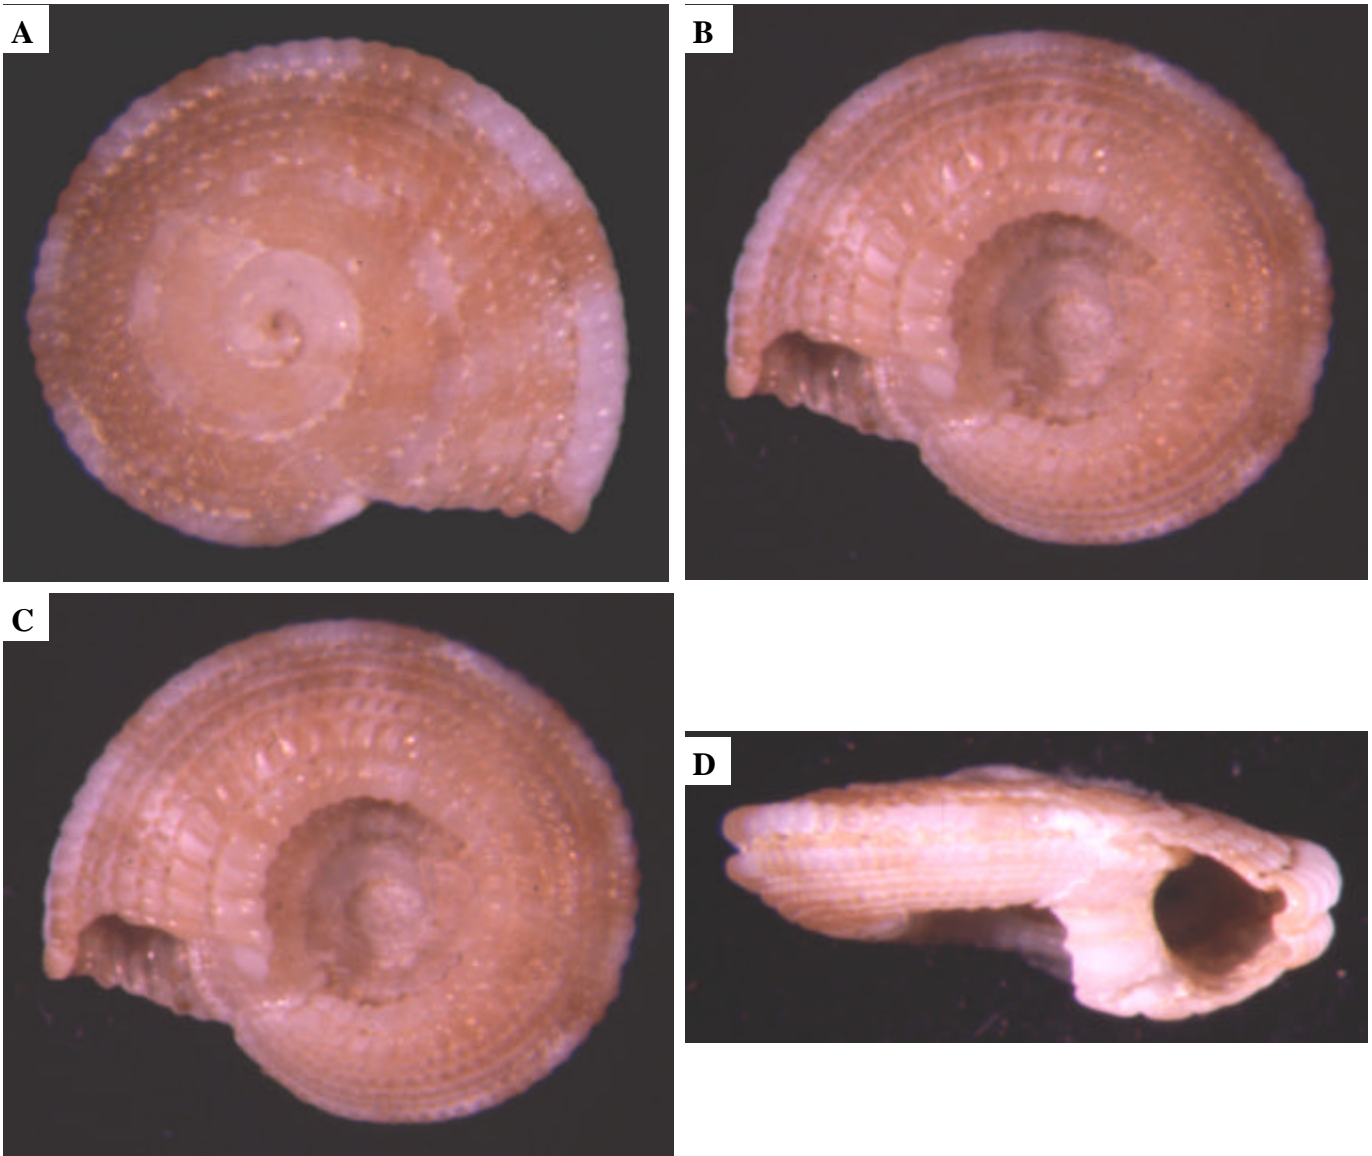

Film 797 5 mm from Oahu.

Heliacus depressiculus Bayer?

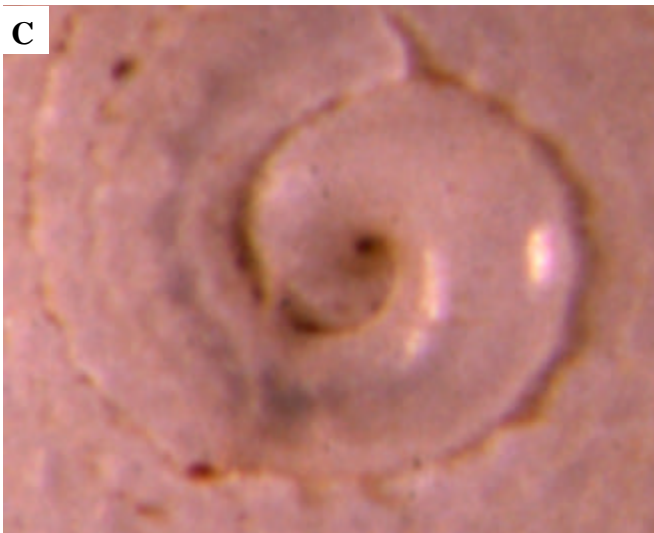

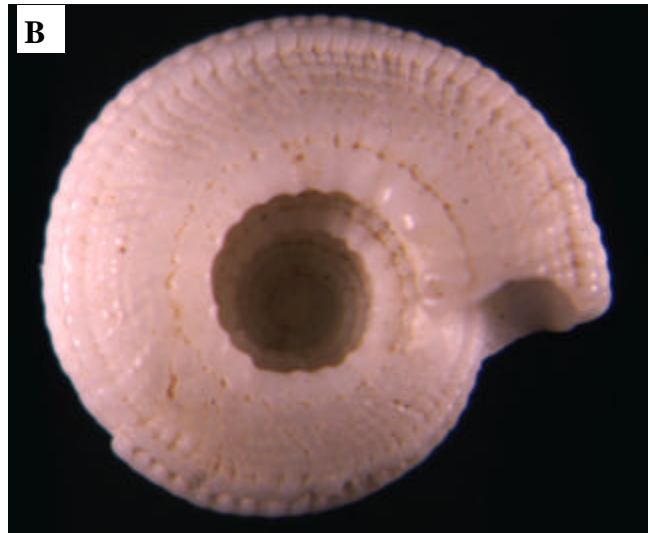

Probably = *variegatus*

Figs. A to C film 798 3 mm from Oahu.

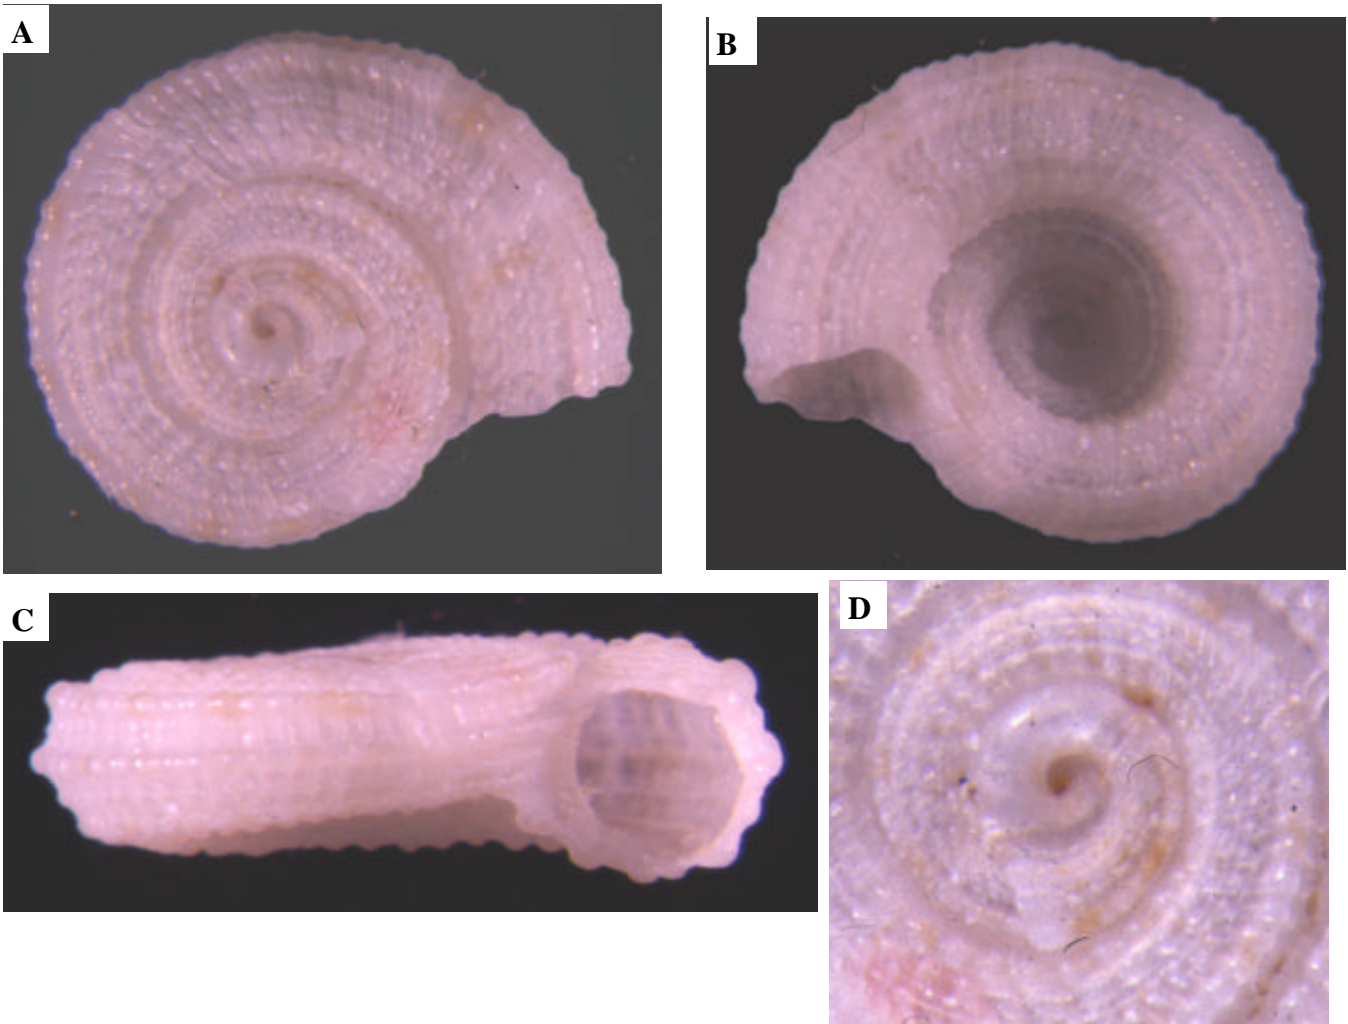

Heliacus dorsuosus* (Hinds, 1844) *n. dubium

Film 800, 4.6 mm from Oahu

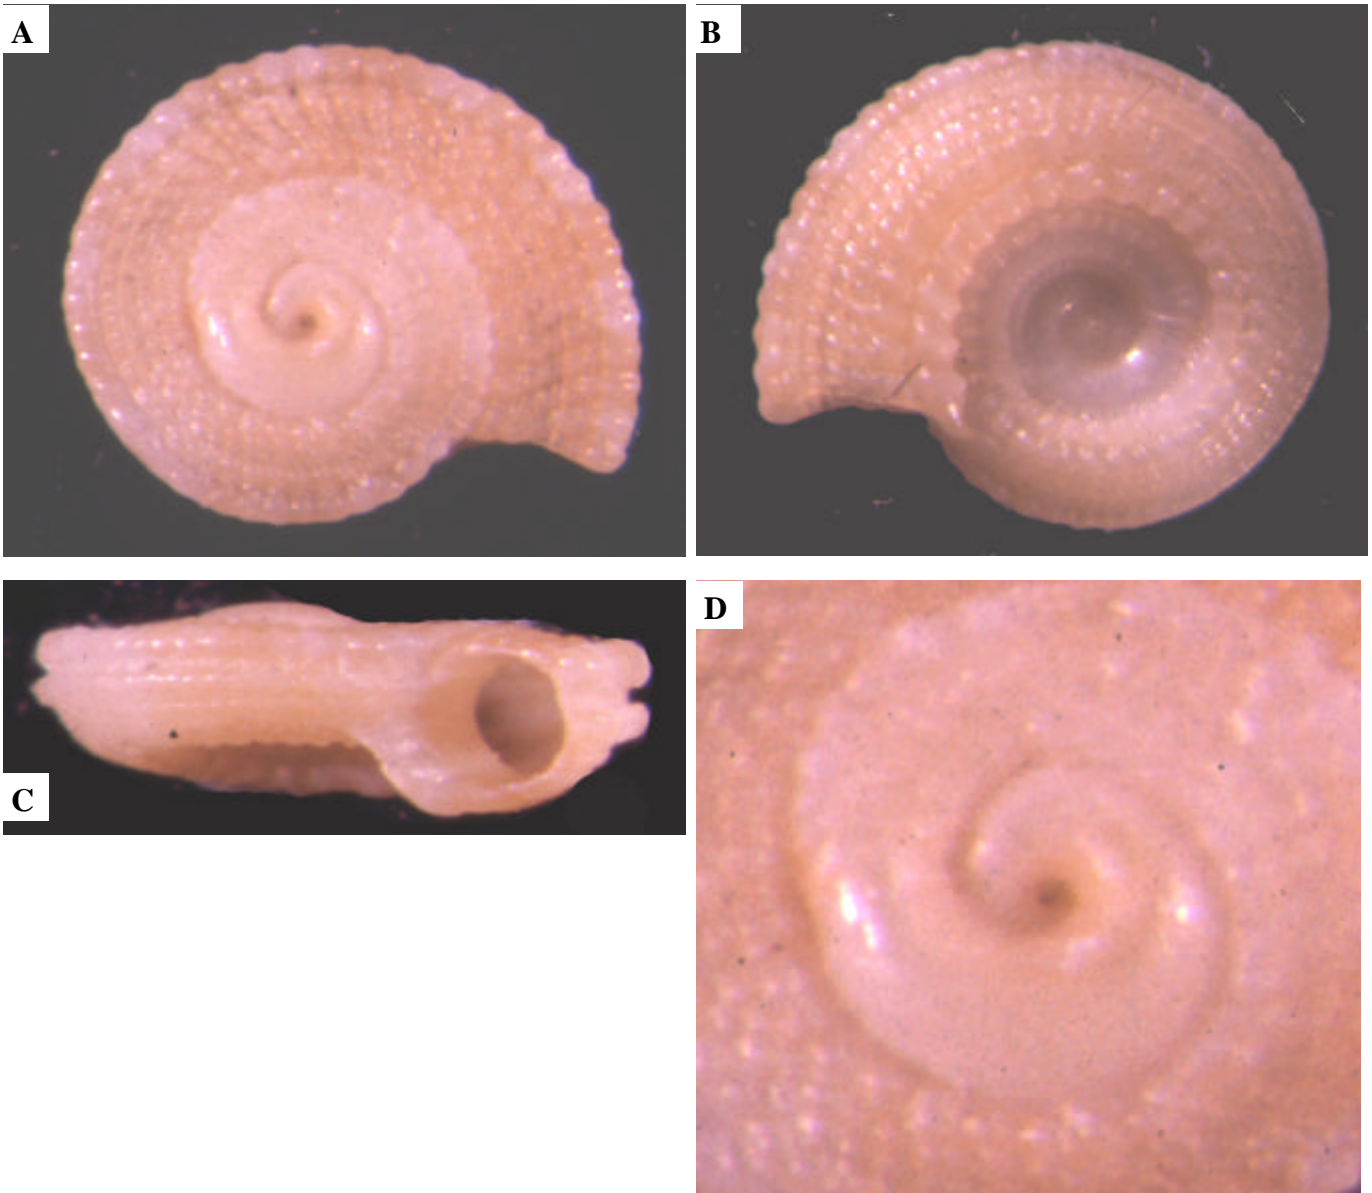

Heliacus elegantissimum

2.2 mm, film 795 from Oahu.

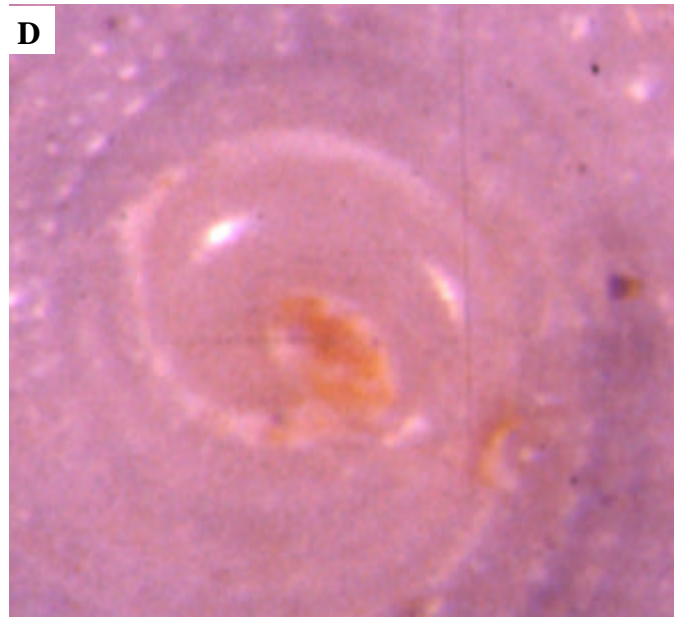

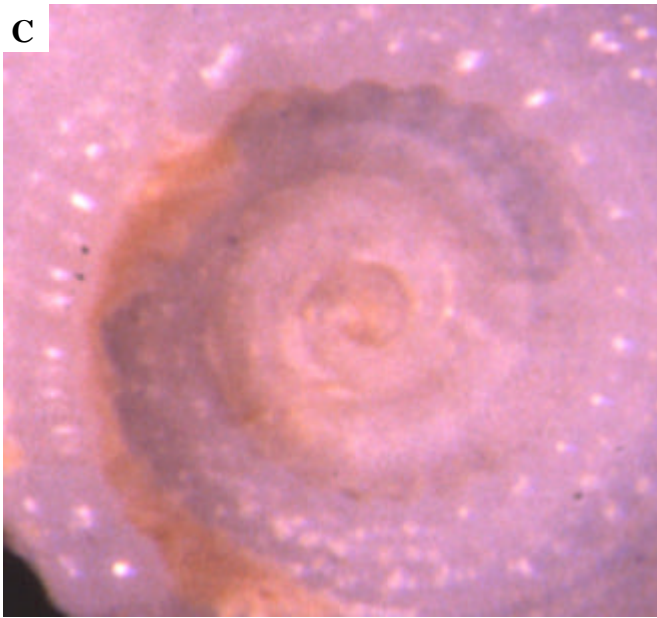

***Heliacus fenestratum* (Hinds, 1844)**

Photo 790 1.4 mm from Oahu. Source of name , pp. 363, 270 in Bieler (from John Wolff).

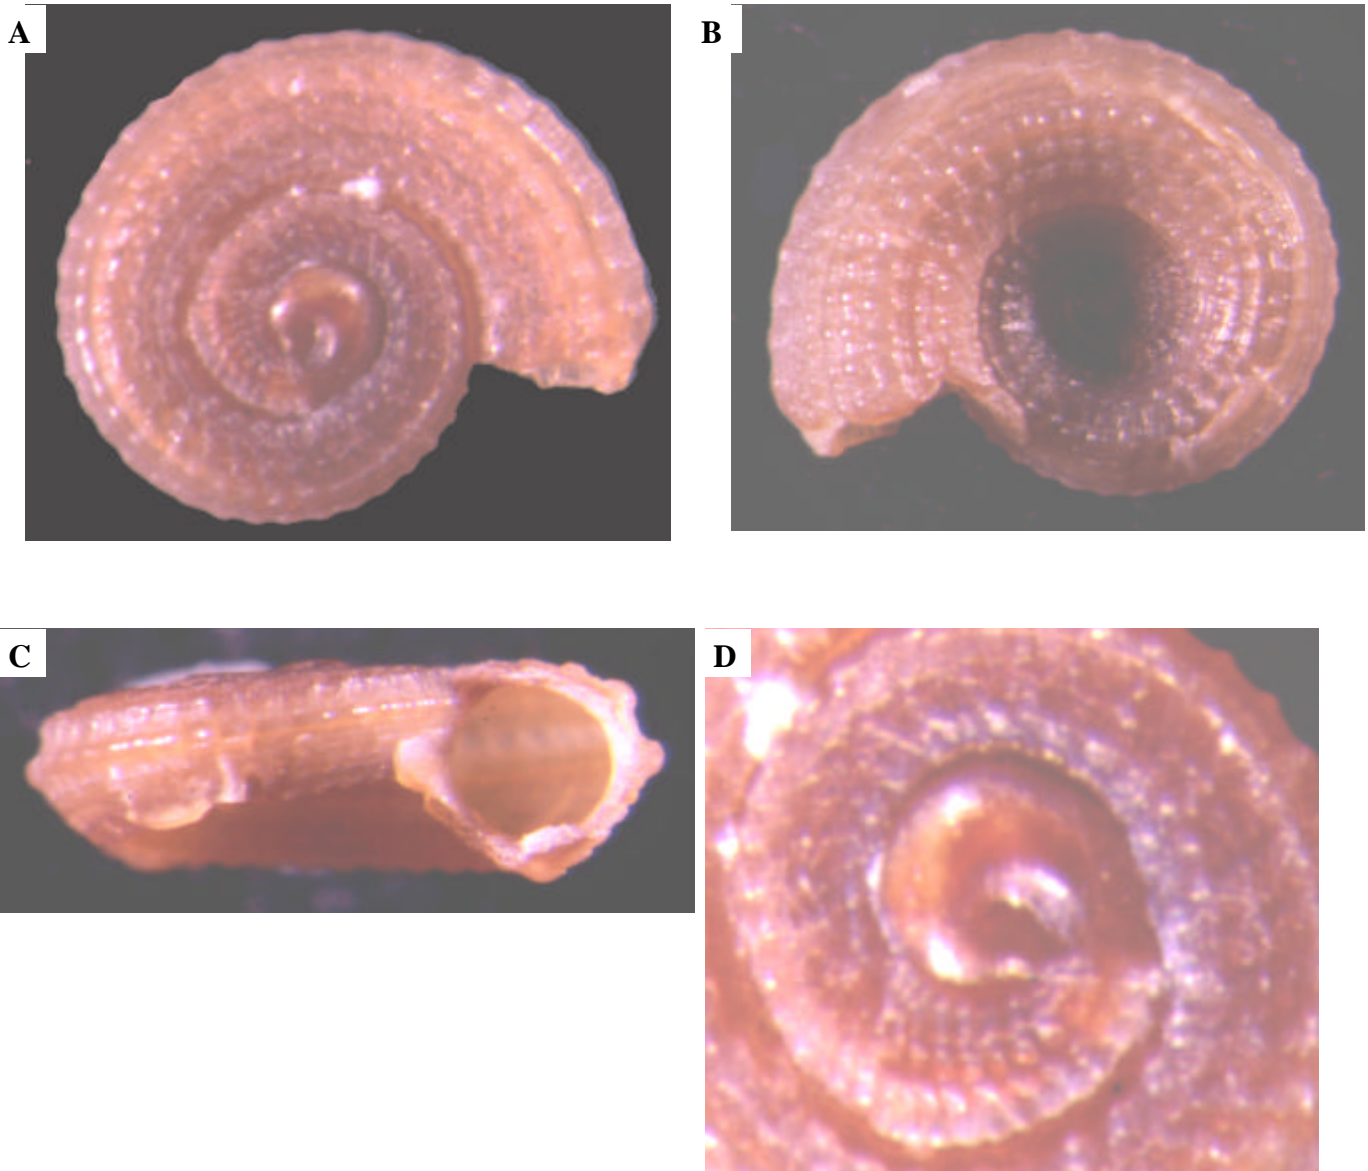

Heliacus granulata

Film 799. 3.4 mm from Oahu. John wolff indicates that Bieler lists 5 species, none of which are valid.

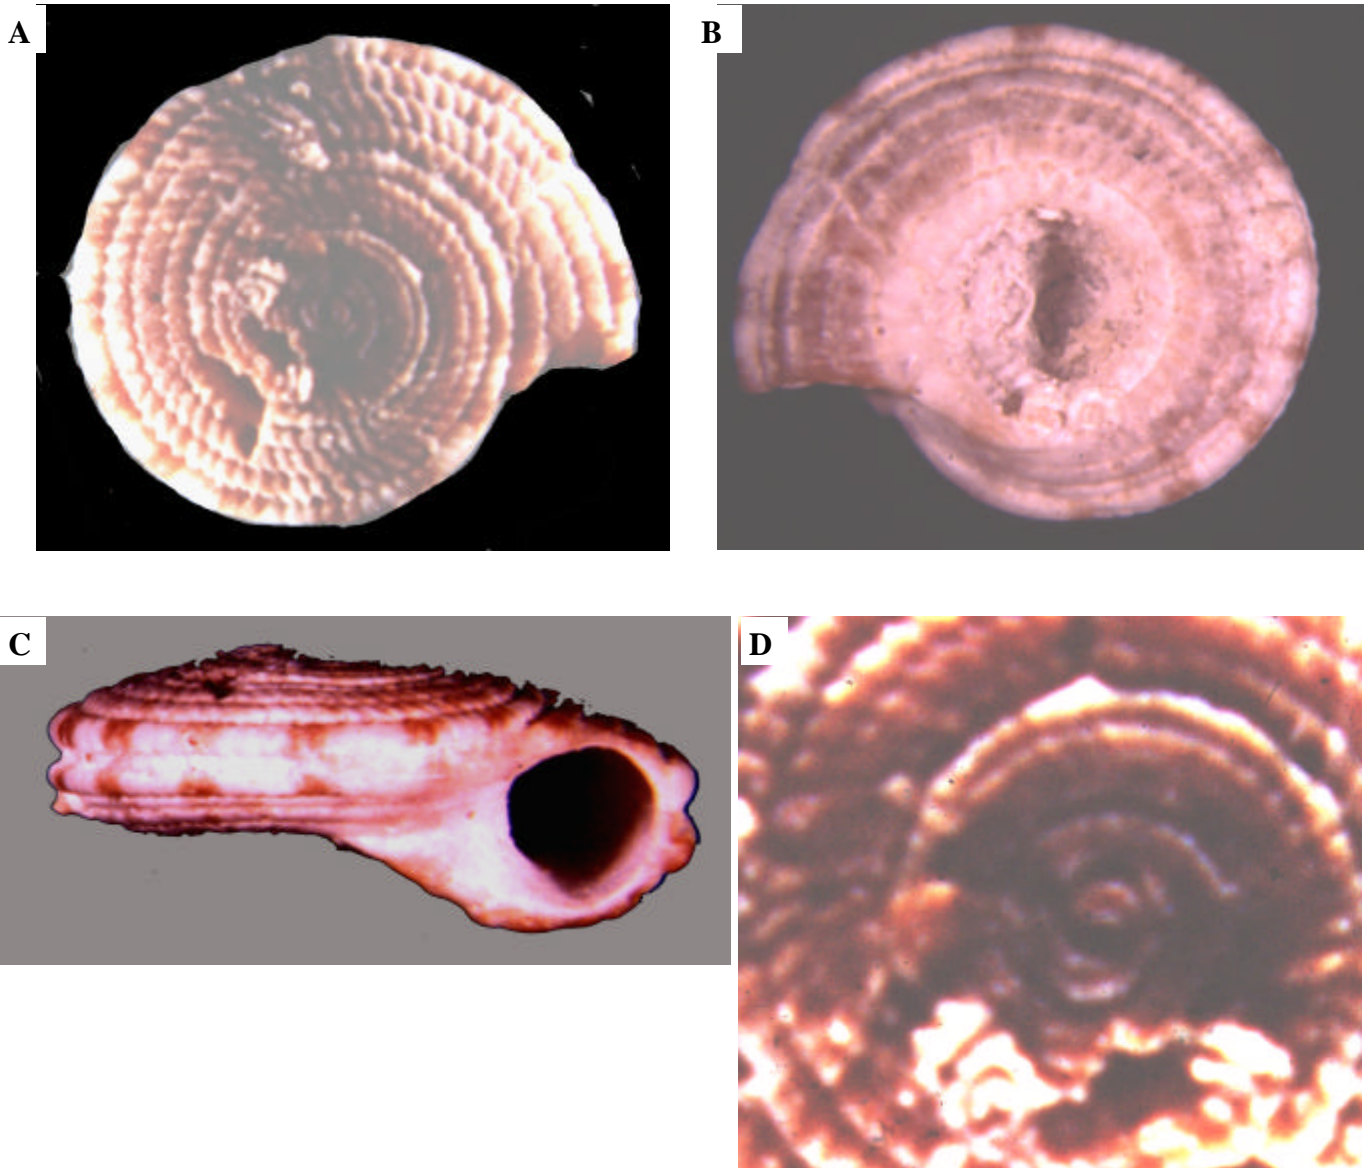

Heliacus implexus

Film 795. 1.0 mm from Oahu.

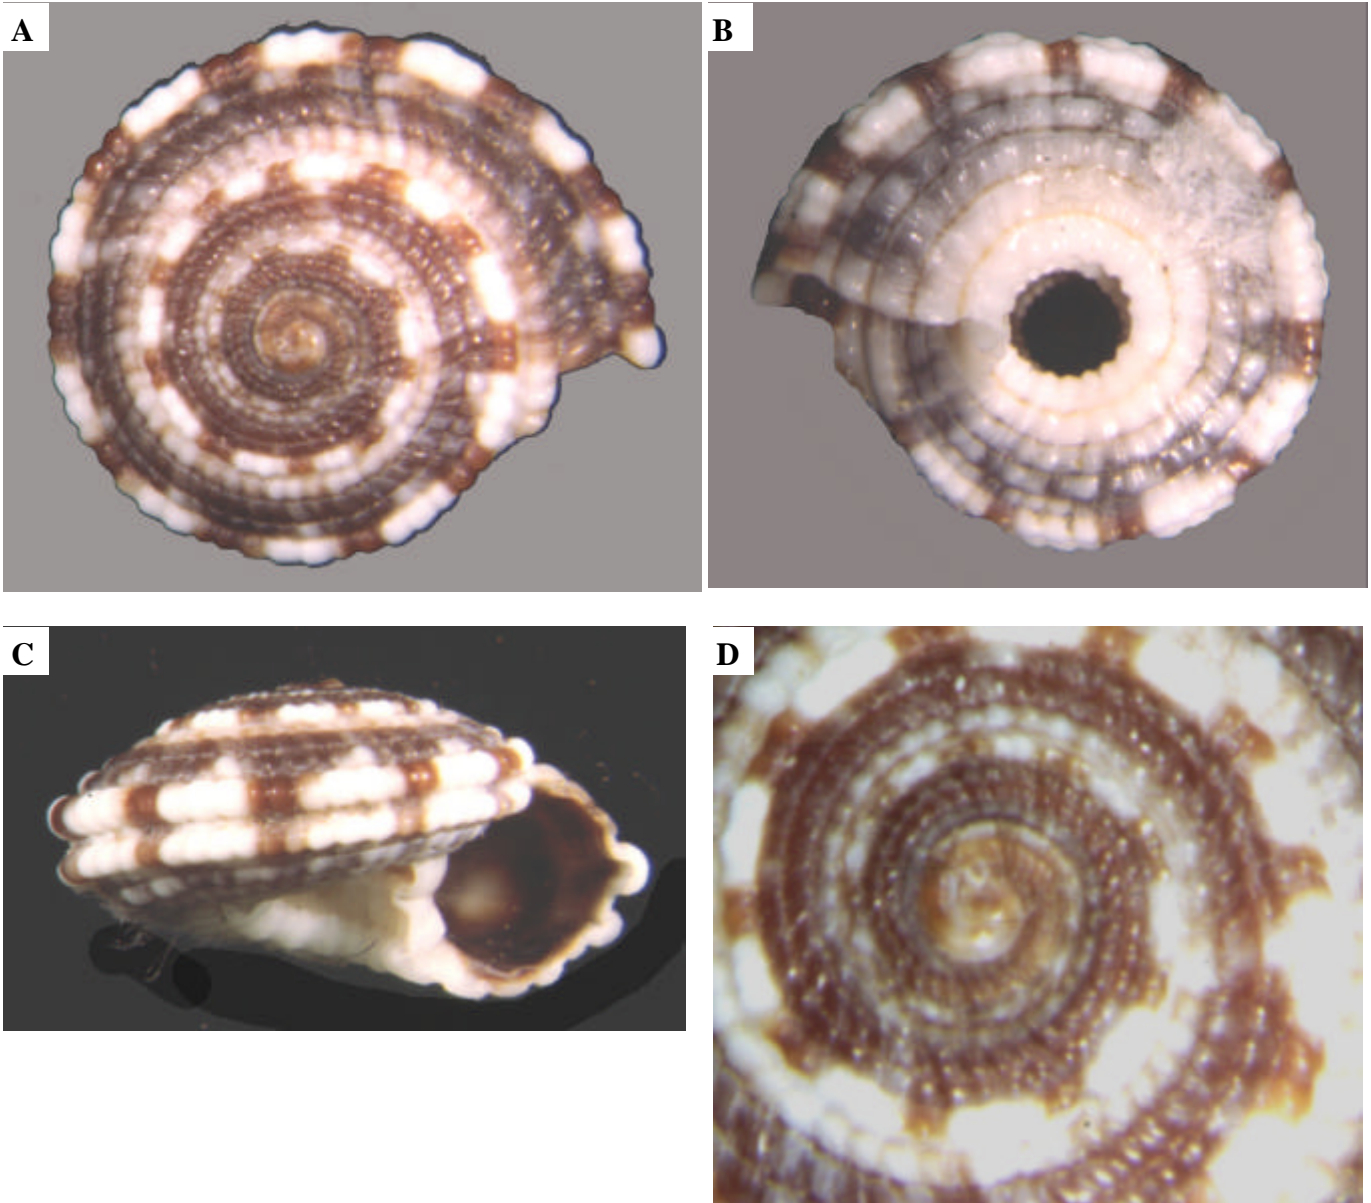

***Heliacus infundibuliformis* (Gmelin, 1791)**

Film 789. 1.4 mm from Oahu. Source of name unknown.

Heliacus pupula (Iredale, 1936) = *implexus*

Film 793. 9.5 mm from Oahu. Source of name unknown.

***Heliaxis variegatus* Bieler, 1993**

Film 792. 5 mm from Oahu.
